

Website Audit & Recommendations Report

Whether your site needs a simple facelift or a total makeover, a website audit is a good place to start.

We can help you improve the effectiveness of your website by evaluating several factors, including:

- ⦿ **Speed and technology**
How quickly do the pages load, even for visitors on dial-up connections?
- ⦿ **Design and appearance**
How attractive and consistent are the pages? Are the graphics optimized for quality while loading quickly?
- ⦿ **Structure and navigation**
Is it easy for your visitors to get to the information they are looking for?
- ⦿ **Functionality and content**
Does the site get your message across?
- ⦿ **Search engine optimization**
Is your site designed to optimize your presence on search engines?

We examine every page of the site and prepare a thorough report that will alert you to any potential problems and give you proposed solutions. We will also provide you with ideas and suggestions that we believe will enhance your presence on the Internet. You can take this report and give it to your existing webmaster or hire us to implement the changes for you.

Special Offer!

Purchase our 10-hour **Custom Website Package** within 60 days of the report and we will credit the \$135 audit fee back to you!
