## INTRANETS, WEBSITES... AND MORE!

*Just imagine... an office where everyone has everything they need — every time they need it!*

It is now possible with the

the only intranet product designed especially for insurance agencies like yours!

**AgencyCentral** gathers all the critical information you may now be keeping in manuals, on bulletin boards, in desk drawers, in filing cabinets or hard drives, and in that certain person's head. Rating and commission schedules, telephone numbers, employee handbooks, procedures and workflows, marketing campaigns, details on new packages — all this and more, organized into an internal web structure (called an intranet), just for your agency.

**AgencyCentral** includes with sections for storing company-specific information, meeting minutes, vacation schedules, procedures manuals, customer service, marketing and accounting information, internal/HR documents, system help and tips, automated forms, employee handbooks and much more. You can customize and expand the intranet in any way that makes sense to your agency.

**AgencyCentral** is the only intranet product that was designed especially for insurance agencies like yours. Prices start at \$1295... discounts are available to user group members. If you would like more information about **AgencyCentral**, call us at the number shown above or check out our Web site at [www.intranetconcepts.com](http://www.intranetconcepts.com)

### **AGENCY WEBSITE DESIGN**

Give your agency the visibility it deserves in the vast world of the Internet. We do not build cookie-cutter sites — we will create a distinctive look that tells your web site visitors, "We are the agency for you!"

### **AUTOMATION PARTNERSHIPS**

With almost 50 years of combined insurance automation experience, we help in any aspect of your automation puzzle. For as little as \$110 a month, Agency Partners receive up to 1½ hours per month of phone and email support which can be used for anything related to automation, such as assistance with intranet development, on-going website maintenance, or even telephone training on a variety of commonly-used software programs. Chances are good that if it involves agency office computing systems, information technology, or the Internet, we've handled it before. We will share our experience with you in deciding your evolving needs and help you to implement them. We will make ourselves available to you each and every month to answer questions, teach you new skills, and help you in any way that we can.

### **ELECTRONIC FORMS**

It's a fact of life... no matter how automated you try to make your office, the insurance carriers insist that you use their "special" applications and other forms in order to do business with them. Are your employees currently forced to fill these forms out by hand or use the typewriter over there in the corner? Let us quickly convert your forms to Microsoft Word templates or scanned PDF forms with form fields that you can fill it out electronically. These forms can then be printed, faxed or emailed to their recipients.

Call us today to discuss your automation needs and learn how our decades of insurance and agency automation experience can help you get the most out of your technology investments!
