

Website Design & Maintenance Services

Whether you're interested in launching a brand new website from the ground up or just want to give your current site a much-needed facelift, we offer professional, affordable design and maintenance services that can be tailored to fit your needs.

While shrink-wrapped websites are a low-cost alternative, we believe that your presence on the Internet is too important to be the same as everyone else's. How your "virtual front door" looks is vital to making a good first impression on your visitors and we strive to make it as attractive as the brick-and-mortar front door to your office.

Here are some of the sites that I have recently launched:

- ⊕ Leland Insurance at www.LelandInsurance.com
- ⊕ GarageGuys Insurance at www.InsureGarages.com
- ⊕ Shuffain Insurance Agency at www.ShuffainInsurance.com
- ⊕ Liscomb Hood Mason at www.LHMInsurance.com

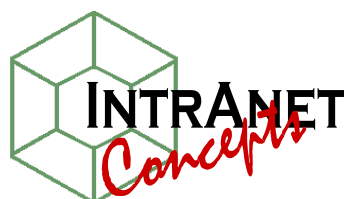

My complete portfolio is available at www.intranetconcepts.com/websites. I invite you to take a look at these sites to get ideas and see the quality of my work. This site also contains informative articles and FAQs about the web design process.

After an initial consultation to determine what your ideas and goals are, I will use the information that you provide and begin construction on your site. If you already have space available on the Internet, I will publish it there so you can review my progress. If you haven't made arrangements for reserving space on the Internet, we will work with you to select a reputable web hosting service and even help you to register your domain or ".com" address. Once your site is live, we offer very affordable rates on maintenance and ongoing website support.

As a rule of thumb, I am able to launch a basic website in about 8-10 hours. If you wish to pay by the hour, our standard rate is \$135, however, we can offer you a significant savings by purchasing one of our packages:

\$1,150 PREPAID	BASIC WEBSITE PACKAGE Includes a free telephone consultation and up to 10 hours of active design time to build a new site. Additional time is billed at \$115 per hour until the site goes live.
\$625 PREPAID	QUICK-LAUNCH WEBSITE PACKAGE Choose from one of our professionally-built designs then customize it with 3 hours of design time included in this affordable price. Additional time is billed at \$115 per hour until the site goes live.
\$575 PREPAID	WEBSITE FACELIFT PACKAGE Includes a free telephone consultation and up to 5 hours of active design time to update your current site. Additional time is billed at \$115 per hour.

Contact me today to discuss your specific needs so we can put together a cost-effective plan for your agency.
